GLOBAL AND RELIABLE SATELLITE COMMUNICATION

With Blue Sky Network's 9555 satellite phone kits, you have access to the only truly global mobile communications network. Anywhere on the planet you need to be, the 9555 is always connected and backed by unmatched network quality and world-class technical support. Here are some of the benefits our customers experience using our satellite phone kits:

- **RUGGED AND RELIABLE:** Stay connected with the ultimate in dependable mobile communications. Our phone kits will work everywhere- without exception. They are engineered to withstand the world's toughest environments, so the world's toughest customers can depend on them as a critical lifeline whenever and wherever need takes them.
- **COMPACT POWER:** The 9555 is the smallest and most powerful phone Iridium has ever made. It has a more hand-friendly form factor and aerodynamic features. This handset is designed to go wherever you do.
- **INTUITIVE COMMUNICATIONS:** The 9555 has an amazingly intuitive interface- making reliable communication more efficient than ever.

ANYWHERE AND EVERYWHERE

The Iridium 9555 satellite phone can handle almost any environment. It is small but determined, sleek but industrial grade, easy to use but powerful. It is resistant to water, dust and shock - but streamlined and packed with innovative features such as an integrated speakerphone, improved SMS and e-mail messaging capabilities, and an upgraded Mini-USB data port.

DIAL-UP DATA CONNECTION

With the integrated data modem, you can easily turn your 9555 phone into an internet modem. Just connect the 9555 to your computer via the Mini-USB data port, activate the data connection on the phone, and you're on your way.

COMPLETE SATCOM PACKAGES

We realize that some things are actually better when limited - like the time and money required to get you started in the world of SATCOM. That's why we've developed turn-key kits for portable satellite communications.

With each of our kits, you'll receive a full-featured Iridium portable satellite telephone, along with an optional comprehensive installation kit that includes everything required by your avionics installer- an FAA TSO'd antenna, FAA-approved coax cable, quick disconnect cable, a TNC/BNC bulk-head adapter, and a VL1000J amplified headset adapter. There's no need to purchase any additional hardware.

PRODUCT	BSN KIT 2	BSN KIT 3

IRIDIUM SATELLITE

The only true global satellite communications service in the world, Iridium delivers essential communication services to and from remote areas where no other form of communication is available. Its constellation consists of 66 low-earth-orbiting (LEO) satellites that provide complete coverage of the earth-including oceans, airways, and Polar Regions.

The 9555 utilizes Iridium technology for highly reliable network performance. Coverage is always available and messages are delivered in near real-time. For continuous satellite communication anywhere in the world, Iridium is the only choice.

THE VL1000J AMPLIFIED HEADSET ADAPTER

Every Blue Sky Network kit shown here comes with the VL1000J Amplified Headset Adapter. Not only will it give you hands-free access, but you'll benefit from the built-in amplifier, as well as the pilot/crew toggle. Or, think outside the limits, and plug in your own CD or MP3 player to enjoy crisp, clear sound. The VL1000J offers pilot-friendly volume and squelch control, complete portability, and interfaces with a standard cellular phone as well.

THE BSN KIT 2

This kit was specifically designed for the General Aviation pilot. It includes the newest generation Iridium 9555 portable satellite phone, our single channel antenna, tuned to Iridium, and everything required for installation. The kit also includes the VL1000J Amplified Headset Adapter, allowing for extended hands-free, volume-controlled sound.

THE BSN KIT 3

This kit offers you the versatility of two telephone locations in the aircraft, but requires only one punch in the aircraft skin. Our dual-channel antenna allows you to "plug-in" from the cockpit or cabin. And of course, as with all of our portable kits, you can take your portable phone with you when you leave the plane. Kit 3 comes standard with the VL1000J Amplified Headset Adapter for hands-free simplicity, as well as a complete installation kit.

BLUE SKY NETWORK

Founded in 2001, Blue Sky Network is the leading provider of global satellite logistics solutions for two-way linking and managing remote aviation, marine, and land mobile assets. Using SkyRouter, the interactive Web portal with detailed mapping and integration with Google Earth, Blue Sky Network links enterprises to personnel and assets anywhere on Earth over the Iridium Satellite network. Blue Sky Network's exceptional customer service and management team make it the perfect partner for adding true global communication to your transport network.
