GSM / GPRS

ASSET TRACKING

GLOBAL ASSET MANAGEMENT

For asset managers all over the world, the D3000 Iridium/GSM transceiver offers an entirely new level of global access and security. Merging satellite and GSM/GPRS communication technologies, the D3000 provides asset tracking and two-way messaging. It is the perfect solution for operators who have high security demands and must maintain visibility and contact in areas where assets are roaming in and out of GSM coverage, or in remote areas for Iridium only operation.

FLEET SECURITY AND EFFICIENCY

Security is of the utmost importance for industries such as oil and gas, utilities, government, and aid organizations that are increasingly operating in hostile environments with large fleets of remote assets. Blue Sky Network understands the urgency for transportation security and offers the D3000 - the ideal tool for any organization looking to improve safety, security, and efficiency in its operations. Working seamlessly with our SkyRouter asset management Web portal, the D3000 offers fleet managers a complete solution to enhance the efficiency of day-to-day operations management, improve control of fleet maintenance, and most importantly, provide near real-time situational awareness in the event of a security related incident. Together, SkyRouter and the D3000 offer ease of deployment and use with an unrivaled global reach and manageability.

ASSET TRACKING, COMMUNICATION AND MANAGEMENT ANYTIME, ANYWHERE

With dispersed workforces and an increasingly "online" world, access to fleet management tools is a key factor in overall fleet optimization. With our SkyRouter portal, asset managers have the power to control their fleet anytime, anywhere. All that's required is an Internet connection, web browser, and secure access password.

SkyRouter offers organizations a simple yet comprehensive tool for fleet management. The D3000 transmits reports directly to the portal for viewing by operators, dispatchers, or even your customers, providing a real-time view of asset locations, easy communication of new or rescheduled jobs, and event monitoring such as speeding alerts. Through analyzing fleet data and improving asset routing, asset managers are well on their way to optimizing fleet utilization.

EFFICIENT AND SAFE FLEET MANAGEMENT - ANYWHERE!

Blue Sky Network's D3000-Series, in combination with our SkyRouter asset management Web portal, can increase fleet operator revenue and realize significant cost savings, while making fleet operation safer. Here are some of the real benefits immediately realized:

- **TRULY GLOBAL COVERAGE:** Track, monitor and manage your fleet regardless of location – today and wherever your future growth may take you.
- **ENHANCE FLEET SECURITY:** Monitor Panic/Mayday alerts directly via SkyRouter and through advanced e-mail/SMS messaging.
- **DRAMATICALLY INCREASE FLEET UTILIZATION:** Real-time dispatching and routing using either voice or text messaging.
- **ENFORCE OPERATOR/DRIVER BEHAVIOR:** Monitor location and driver behavior, thereby minimizing idle time and unauthorized use, as well as lowering fuel consumption.
- **INCREASE CUSTOMER SATISFACTION:** Accurate and timely service delivery without billing disputes. You can even provide customers with access to fleet tracking at no added cost.

D3000 FEATURES & SPECIFICATIONS

HIGHLIGHTED FEATURES:

- Completely global coverage
- Dual mode option (Iridium/GSM)
- Near real-time location reporting
- Optional Iridium voice connectivity
- Easy access through the SkyRouter online Web portal
- Google Earth integration
- Vehicle data integration and reporting
- Event reporting (start/stop, speeding, etc.)
- Driver identification
- Secure and reliable message delivery
- Remote management of device settings

SPECIFICATIONS:

Communications:	Iridium Satellite and/or quad band GSM/GPRS
GPS:	Embedded 12 channel GPS
Display:	Vivid LCD with backlighting
Keyboard:	Numeric with alpha input
Operating System:	Microsoft Windows CE
External Interfaces:	RS232 and I/O ports
Dimensions:	W 7.9" x H 3.2" x D 1.5"
Weight:	1.1 lb
Power:	9-18 VDC
Configurations:	Optional configuration w/o display & keyboard

IRIDIUM SATELLITE

The only true global satellite communications service in the world, Iridium delivers essential communications services to and from remote areas where no other form of communication is available. Its constellation consists of 66 low-earth-orbiting (LEO) satellites that provide complete coverage of the earth—including oceans, airways, and Polar Regions.

The D3000 utilizes the latest Iridium technology for packet data transmissions and optional voice connectivity. Coverage is always available and messages are delivered in near real-time. For continuous satellite communication anywhere in the world, Iridium is the only choice.

GSM/GPRS

The Global System for Mobile communications is the most popular standard for mobile phones in the world. GSM service is used by over 2 billion people across more than 212 countries and territories. General Packet Radio Service (GPRS) is a Mobile Data Service available to users of GSM.

The D3000 provides an easily accessible GSM SIM card tray. Users can provide their own GSM/GPRS SIM cards or service can be facilitated through Blue Sky Network.

EASY AND FLEXIBLE INSTALLATIONS

The D3000 is intended for smooth and quick installation in any vehicle or vessel type. Power is supplied through a cigarette lighter adapter, wall charger or directly from the vehicle/vessel power. Whether mounted on an upward facing surface or hanging from a ceiling, safely installing the terminal is simple with various optional configurations.

CONFIGURATIONS

The D3000 is available in four options to meet your exact needs:

D3000 I	Iridium Tracking and Messaging
D3000 IG	Iridium and GSM/GPRS Tracking and Messaging
D3000 IV	Iridium Tracking, Messaging, and Voice
D3000 IGV	Iridium and GSM/GPRS Tracking and Messaging plus Iridium Voice

BLUE SKY NETWORK

Founded in 2001, Blue Sky Network is the leading provider of global satellite logistics solutions for two-way linking and managing remote aviation, marine, and land mobile assets. Using SkyRouter, the interactive Web portal with detailed mapping and integration with Google Earth, Blue Sky Network links enterprises to personnel and assets anywhere on Earth over the Iridium Satellite network. Blue Sky Network's exceptional customer service and management team make it the perfect partner for adding true global communication to your transport network.
