SAFETY/SECURITY

VERSATILE SOLUTION FOR EFFICIENT FLEET MANAGEMENT

With Blue Sky Network's D411 Iridium-based vehicle tracking transceiver, you will always be in touch with your land mobile assets no matter where they are in the world. Here are some of the benefits the D411 has to offer in combination with our unique SkyRouter Web portal:

- **TRULY GLOBAL COVERAGE:** Real-time access to tracking and event reporting no matter where in the world you operate.
- **ENHANCE FLEET SECURITY:** Receive automatic position reports, panic alerts, and event reports via SkyRouter for full control of your fleet.
- **INCREASE FLEET PRODUCTIVITY:** Optimize time by quickly locating the nearest vehicle for a new job or task and re-routing a trip in seconds if scheduling changes.
- **UNIFIED FLEET MANAGEMENT:** All of our solutions seamlessly integrate with SkyRouter for a unified view of all your transportation assets – land, sea and air.

SIMPLIFIED GLOBAL FLEET MANAGEMENT

Simple to install and easy to configure, the D411 vehicle tracking device is the ideal solution for fleets operating in areas with or without GSM coverage. Because the D411 tracks your fleet by satellite and not by cellular, there are never any roaming charges or coverage dropouts. And it works seamlessly with our SkyRouter asset management portal to provide powerful asset management tools that enhance fleet safety, productivity and visibility.

ENHANCED SAFETY & SECURITY

The D411 offers I/O ports for optional safety features such as panic alerting and custom event reporting. Additional e-mail alerts can be programmed so that logistics managers are immediately notified if anything out of the ordinary occurs. The D411 also installs covertly, adding to driver security when operating in dangerous and remote areas.

UNIFIED FLEET MANAGEMENT

The D411 vehicle tracking solution can be managed alongside all of your organization's mobile resources. Blue Sky Network's entire product line of land, marine, and aviation hardware seamlessly integrate with our SkyRouter asset management portal, giving you a unified view of all your assets on one screen. With Blue Sky Network's solutions, managing your fleet just got easier.

D411 FEATURES & SPECIFICATIONS

HIGHLIGHTED FEATURES:

- Near real-time location reporting
- Optional panic alerting
- Custom event reporting (start, stop, speeding, etc.)
- Telemetry reporting
- Multiple input/output control options
- Remote management
- Covert installation

SPECIFICATIONS:

GPS:	Embedded 12 channel GPS
External Interfaces:	RS-232, 5 Digital I/O, 1 Analog Input
Temperature:	-20C to 60C
Humidity:	Up to 80%
Power:	9-36 VDC

IRIDIUM SATELLITE

The only true global satellite communications service in the world, Iridium delivers essential communication services to and from remote areas where no other form of communication is available. Its constellation consists of 66 low-earth-orbiting (LEO) satellites that provide complete coverage of the earth-including oceans, airways, and Polar Regions.

The D411 utilizes highly reliable Iridium technology for packet data and short burst data transmissions. Coverage is always available and messages are delivered in near real-time. For continuous satellite communication anywhere in the world, Iridium is the only choice.

EASY INSTALLATION AND USE

The D411 comes with a complete installation kit so that your system can be up and running in no time. For added ease and convenience, the D411 can also be configured remotely from SkyRouter, allowing I/O settings and position reporting intervals to be instantly updated while your vehicle fleets are on the move.

3RD PARTY DATA AND SERVICES INTEGRATION

Users may have a preference for a different mapping, dispatching, or reporting solution. Our SkyRouter Web portal offers flexibility with full integration of many 3rd party mapping solutions.

BLUE SKY NETWORK

Founded in 2001, Blue Sky Network is the leading provider of global satellite logistics solutions for two-way linking and managing remote aviation, marine, and land mobile assets. Using SkyRouter, the interactive Web portal with detailed mapping and integration with Google Earth, Blue Sky Network links enterprises to personnel and assets anywhere on Earth over the Iridium Satellite network. Blue Sky Network's exceptional customer service and management team make it the perfect partner for adding true global communication to your transport network.
