# GLOBAL SATELLITE COMMUNICATION

At Blue Sky Network, we continue to develop and enhance mobile satellite communication.

Because of our continued development and innovation, we are now able to add a full range of land mobile and marine products to our already extensive aviation line. Whether you are looking for voice, asset tracking, or two-way messaging, we have the right solution for you—including the option of dual-mode Iridium and GSM communication. And no matter what Satcom kit you choose, we're sure that you will always be globally connected.

We also provide a powerful Web portal for asset management and technical support 24 hours a day, seven days a week. Everything you need to take control of your land mobile and marine fleet is right here at your finger tips. So take a ride with us – at Blue Sky Network, the sky is no longer the limit.

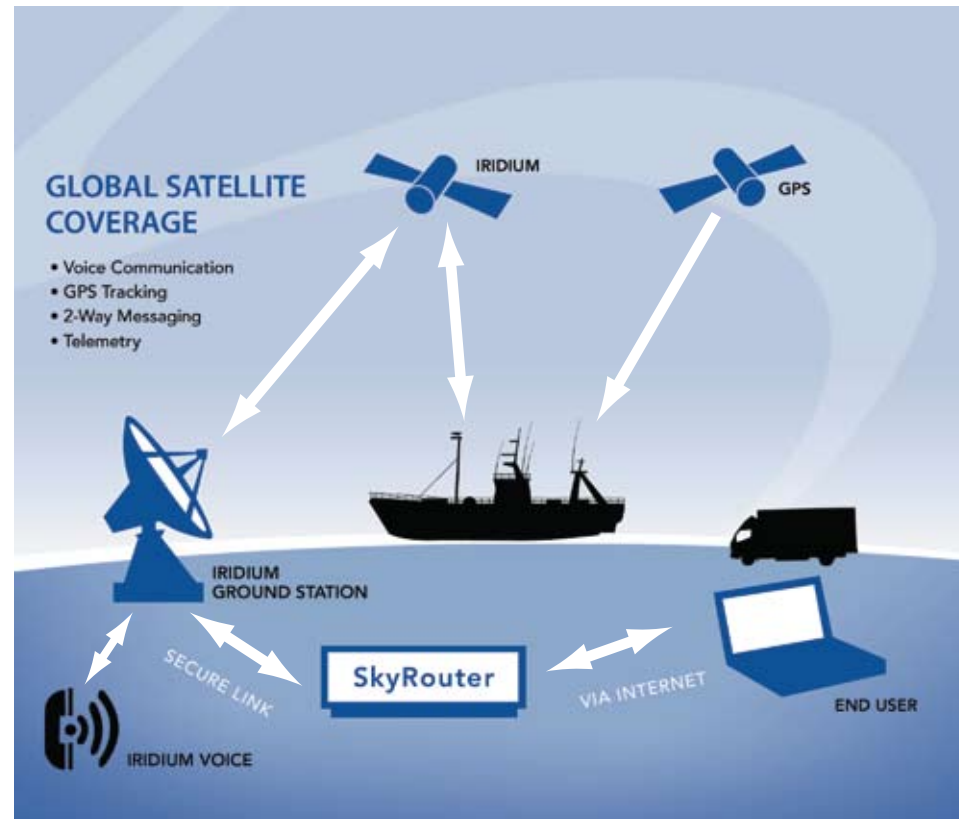

“With Blue Sky Network’s reliable tracking system, we now have 100% global coverage, even in the remote areas of the Arctic, with all the essential tools to manage our marine fleet.”

Lars Borris Pederson  
Operations Department  
Royal Arctic Line A/S

# SEAMLESS INTEGRATION

In the land mobile and marine industry, accessing real time, worldwide voice and data communication is invaluable. Through the seamless integration of Iridium Satellite, GPS, and Blue Sky Network’s Satcom systems, asset operators can count on staying in touch at all times.

Whether it’s voice calling, two-way messaging, or automatic position reporting, you can always count on Blue Sky Network for reliable global satellite communication. For the fleet operator, everything is at your fingertips with SkyRouter, Blue Sky Network’s Web-based asset management portal.

# WE GROW WITH YOU

Since our first day of operation, Blue Sky Network has pioneered affordable and global satellite communication for the aviation industry. As our customers’ needs have grown, so have we.

Many of our aviation customers are coordinating their fleet activity with land mobile and marine assets. Their need for a truly global, all-inclusive satellite communication solution across transportation platforms has become imperative and essential in managing their transportation fleet.

As a result, we’ve done a lot of research and development to add to our product line and provide the same advanced Satcom solutions for land and marine assets. We are responding to our customers’ needs for a comprehensive solution. And with our SkyRouter asset management Web portal, we’ve made it simple for customers to view and track all of their assets- aviation, land, and marine- on one screen. It doesn’t get any easier than that!

## ENJOY THE BENEFITS OF BLUE SKY NETWORK TECHNOLOGY

With Blue Sky Network's innovative technology, our land mobile and marine tracking, two-way messaging, and voice solutions can provide you with safer and more efficient fleet operation, as well as significant cost savings.

### MANAGE YOUR FLEET WITH ADVANCED ASSET TRACKING

No matter the size, type, or location of your assets, Blue Sky Network's tracking solutions provide advanced features that can make fleet operation safer and more efficient. Both asset managers and operators will be empowered by the tremendous amount of control our land and marine tracking features give, such as viewing all assets, advance warning of impending issues, and re-routing notification.

#### BENEFITS OF ADVANCED ASSET TRACKING:

- Full control of your fleet operation with our near real-time asset tracking tools
- Always knowing in near real-time if an asset has an emergency through our mayday feature and active/inactive asset monitoring alerts
- Ability to find the nearest asset for a new job or task
- Ability to re-route asset in seconds if weather or scheduling changes
- Assurance that all assets are operating safely and notified if anything out of the ordinary occurs
- Least cost-routing with GSM/GPRS option

### ADD VERSATILITY WITH TWO-WAY MESSAGING

Two-Way Messaging is an exceptionally convenient feature that allows operators, drivers, crew members, and dispatchers to communicate quickly and easily. Send and receive messages from anywhere in the world with this versatile feature.

#### BENEFITS OF TWO-WAY MESSAGING:

- Short code messaging from the driver or crew, such as at destination, point of interest, or requesting weather notifications, keeps everyone connected
- Ability to send and receive full text messages directly between the asset and your SkyRouter or regular e-mail account
- Dispatch can be quickly notified of scheduling changes
- Asset operations managers can receive trip or daily reports from crews in remote locations

### STAY GLOBALLY CONNECTED WITH FLEXIBLE VOICE OPTIONS

Blue Sky Network provides flexible voice options to meet your exact communication needs. We have the perfect solutions for those who need to be in constant voice communication with large fleets of remote assets. Managers can call their assets anytime from their office, marine vessel, or even their own home. Vessel and vehicle operators can also make calls straight from their transceivers, or carry a portable option wherever they go.

#### BENEFITS OF VOICE COMMUNICATION:

- Our voice solutions allow you to always be in immediate contact with crews and passengers
- Crews can call to report maintenance issues before reaching their destination, allowing quicker turnarounds
- Voice minute usage can easily be monitored via daily updates of call logs in your online SkyRouter account

### INSTALLATION PACKAGES

At Blue Sky Network, we believe in convenience. That's why all of our Satcom solutions come with a complete installation kit to get your system up and running in no time.

### SERVICE PLANS

We offer a wide range of monthly voice and data plans to meet your specific needs.

#### VOICE

Pricing for Iridium voice coverage is based on a standard, flat-rate fee per minute, and you never have to pay additional long-distance charges.

Our voice plans start with as few as 55 minutes per month, a voice mailbox, and optional SMS messaging. You can also choose plans that include additional SIM cards, or opt for one of our pre-paid cards.

#### DATA

Iridium's packet data plans provide affordable data communications. We offer four plans depending on your data usage. Pricing is based on data units and reported on your simplified monthly billing statement. Fleet plans are also available.

# GLOBAL SATELLITE COMMUNICATION SOLUTIONS

## INDUSTRIES WE SERVE:

- Oil & Gas
- Search & Rescue
- Cargo
- Disaster / Emergency Relief
- Mining

"We firmly believe Blue Sky Network is the best choice for our satellite communication needs, as its solutions are reliable and surpass competing options."

Gerry Golden  
Vice President & General Manager  
Rotorcraft Leasing

## TRACKING, TWO-WAY MESSAGING, & VOICE

|   |  |
|---|--|
| 1 | <p><b>D2000</b><br/>Available for purchase or rental, the D2000 is our compact, carry-on asset tracking and two-way messaging transceiver ideally suited for transport between assets. With a two-line LCD screen, numeric keyboard for short code messaging, laptop connection for enhanced two-way messaging, and Quick Position button for Mayday alerting, the D2000 is a powerful solution.</p> |
| 2 | <p><b>D3000</b><br/>The D3000 is a robust tracking, two-way messaging, and optional voice transceiver with satellite and optional GSM/GPRS capability. This is the perfect solution for operators who have high security demands and must maintain contact in areas where assets are roaming in and out of GSM coverage, or in remote areas for Iridium only operation.</p>                          |
| 3 | <p><b>ComCenter</b><br/>The ComCenter is our fixed Iridium voice and data solution rich in features. With this system, asset managers can call their assets anytime from their office, marine vessel, or even their own home, at a very low per-minute cost.</p>   |
| 4 | <p><b>9505A</b><br/>The Iridium 9505A portable satellite phone is the ideal voice solution for those in need of a handheld phone wherever they go. The 9505A can also be installed in combination with our other solutions, providing the ultimate in flexibility.</p>   |

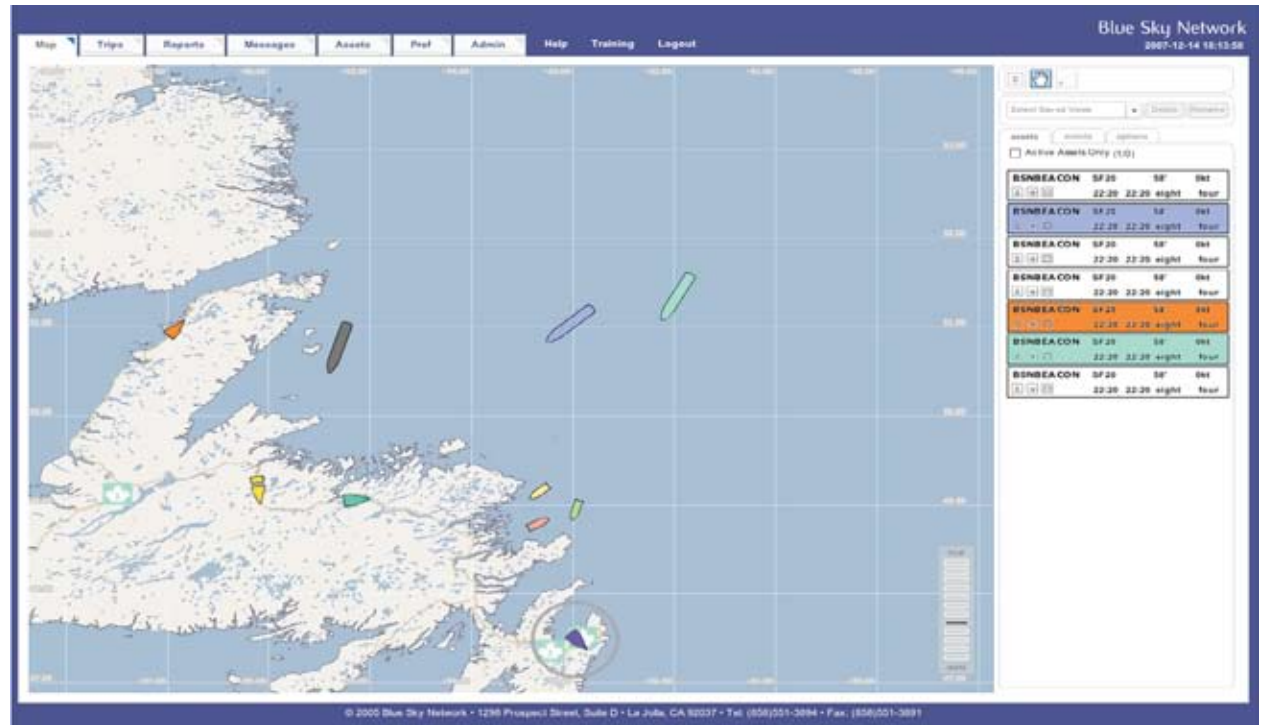

# TAKE CONTROL OF YOUR FLEET

## SKYROUTER - YOUR LINK TO GLOBAL FLIGHT TRACKING AND COMMUNICATION

For the first time ever, operations managers, dispatchers, and even your customers have the power to control all of their land mobile and marine assets from the comfort of their own desk. Asset management has never been easier with our powerful SkyRouter asset management portal.

SkyRouter is an entirely unique global Web portal designed and operated by Blue Sky Network to support globally dispersed and critical assets. The SkyRouter portal works seamlessly with Blue Sky Network's tracking and two-way messaging transceivers and is designed to transmit satellite messages from assets in route or end users on the ground in the form of GPS position reports, special events (start, stop, speeding, etc), two-way text messages, or telemetric data reports.

Included in our SkyRouter Web portal is a smooth global mapping solution accessible to anyone with an Internet connection. As an added feature, Google Earth's three-dimensional map can also be integrated for past and live trip tracking.

## SKYROUTER BENEFITS

- SkyRouter puts you firmly in control of your land mobile and marine assets by giving you a near real-time view of fleet activity
- Operators can use the built-in trip planning tools to schedule trips for an entire day and calculate the effect of re-routing and re-scheduling
- Operators often give their customers access to track their land or marine asset in SkyRouter, thus improving the customer experience and building loyalty in the long run
- Using SkyRouter's built-in alerting mechanisms, you will always be notified, either in the map display or via email/SMS, if there is an emergency or if an asset becomes inactive before it reaches its destination
- By monitoring driver/operator behavior through SkyRouter's features, you can minimize idle time and unauthorized use as well as lower fuel consumption

Many more SkyRouter features are included. Please contact us for further details or visit our website at [www.blueskynetwork.com](http://www.blueskynetwork.com).

## SKYROUTER DATA EXCHANGE

Blue Sky Network offers even more flexibility for asset managers with DataExchange. This tool allows users and 3rd party software vendors to access data from SkyRouter. We integrate satellite messaging from our remote transceivers with a number of different vendors today.

## SECURITY AT ITS BEST

SkyRouter users can operate with peace of mind. Our system is completely reliable and secure. SkyRouter's main server is housed in a secure hosted facility and backed up by redundant servers and power sources, allowing its services to operate at near 100% reliability.

## UNSURPASSED CUSTOMER SERVICE

At Blue Sky Network, customer satisfaction is our number one priority. We're committed to answering all of your questions and finding the best satellite communications kit for your individual situation. We even provide technical support 24-hours-a-day, seven days a week. So go ahead and give us a call. We'll be here for you.

## BLUE SKY NETWORK

Blue Sky Network is the leading provider of global logistics solutions for two-way linking and managing remote aviation, marine, and land mobile assets via satellite. Using its interactive Web portal, SkyRouter, with detailed mapping and integration with Google Earth, Blue Sky Network links enterprises to personnel and assets anywhere on earth over the Iridium satellite network. Advanced data and voice products enable users to customize features including safety and event reporting. Blue Sky Network's exceptional customer service and management team make it the perfect partner for adding true global communication to your transport network.

## IRIDIUM SATELLITE

Blue Sky Network is a Tier One Service Partner, Value Added Manufacturer, and Value Added Reseller for Iridium Satellite. The only true global satellite communications service in the world, Iridium delivers essential communications services to and from remote areas where no other form of communication is available. Its constellation consists of 66 low-earth-orbiting (LEO) satellites that provide complete coverage of the earth—including oceans, airways, and Polar Regions. For continuous satellite communication anywhere in the world, Iridium is the only choice.
